AGT Group (R&D) GmbH
Hilpertstraße 35
64295 Darmstadt, Germany

Job Opening – Darmstadt/Germany

Backend Developer/ Senior Backend Developer

AGT is all about striving for the best Analytics for the Internet of Things!

Being always in search of new ideas turning into great new features and products, we would love to meet and welcome team members who can join the ride and drive us forward to one of our offices: US (San Francisco, New York), Switzerland (Zurich), Germany (Darmstadt) and Israel (Herzliya).

Position Summary

We are looking for experienced software developers for the server and infrastructure side of AGT's new IoT (Internet of Things) and analytics applications. Our technological focus is on open standards, -tools and -frameworks using Java, Python and JavaScript. If you are a creative mind with industry experience in server side development who is looking for new and exciting challenges in making IoT analytics applications and frameworks happen, we are inviting you to join our growing international R&D team located in Darmstadt, Germany.

Requirements

- Master in Computer Science / -Engineering or equivalent
- Industry experience in the area of server based Java or Python development
- Experience with cloud-based software design (specifically AWS) is a plus
- Good spoken English

Our offer

- Competitive salary
- Help with visa and relocation to Germany
- Full time/long-term contract

Send you CV to Senior Researcher, Roman Katerinenko, rkaterinenko@agtinternational.com
